Kitchen fans

Virtuviniai ventilatoriai

Wentylatory kuchenne

Кухонные вентиляторы

Kitchen exhaust units are used for installation where the air is slightly greasy or the air temperature is up to 120°C. Unit has a swing-out door for easy inspection and service. The direction of the door opening is from left to right. The fan is isolated from the casing via connectors and anti-vibration mounts.

Impellers: forward-curved blades made of galvanized sheet steel.

Motor: Maintenance free, speed controllable, motors safety class IP55, On/Off safety switch.

Housing: The casing is manufactured from double-skinned galvanized steel and is insulated with 50 mm mineral wool.

Ventiliatoriai skirti virtuvėms arba ištraukti riebaluotą orą, kur temperatūra ne aukštesnė nei 120°C. Įrenginyje sumontuotos darinėjamos durėlės iš kairės pusės - lengvam ir patogiam aptarnavimui. Ventilatorius izoliuotas nuo korpuso specialia lankščia jungtimi ir antivibracinėmis kojėlėmis.

Sparnuotė: į priekį lenktais sparneliais, cinkuoto plieno.

Variklis: priežiūros nereikalaujantis, valdomas greičio regulatoriumi, variklio apsaugos klasė IP 55, komplektuojamas su saugos kirtikliu.

Korpusas: cinkuota skarda, dviguba izoliacija iš 50mm mineralinės vatos.

Wentylatory kuchenne są stosowane do instalacji, w której powietrze jest nieco tłuste lub temperatury powietrza dochodzą do 120 °C. Obudowa wentylatora otwieralna dla łatwej kontroli i obsługi. Kierunek otwierania drzwi - od lewej do prawej. Wentylator jest odizolowany od obudowy poprzez złącza i izolację akustyczną.

Wirnik: zakrzywione łopatki wykonane z ocynkowanej blachy stalowej.

Silnik: bezobsługowy, regulowana prędkość, klasa IP 55,

Włącznik / Wyłącznik bezpieczeństwa.

Obudowa: wykonana z galwanizowanej stali i jest izolowany wełną mineralną o grubości 50 mm.

Куханые вытяжные вентиляторы для систем вентиляции, устанавливаются в системы, где воздух немножко загрязнен или температура достигает 120°C. Вентилятор имеет двери, для удобного осмотра и обслуживания. Направление открытия двери - слева на право.

Вентилятор изолирован от корпуса с помощью соединителей и имеет антивибрационные крепления.

Крыльчатка – загнутые вперед лопасти, изготовлены из оцинкованной стали.

Двигатель – не требующий ухода, регулируемая скорость вращения, класс безопасности двигателя - IP 55, защитный выключатель On/Off.

Корпус - изготовлен из оцинкованной стали и двойных стенок, 50 мм изоляция, из минеральной ваты.

\* performance operating area is limited. Do not exceed the normal current, additional overload protection is required. When frequency converter is used for speed control than shielded cable must be used for power supply.
